- ✓ Flush Valve & Reservoir

- Flush Tanks
- ✓ Complete Self Contained Units

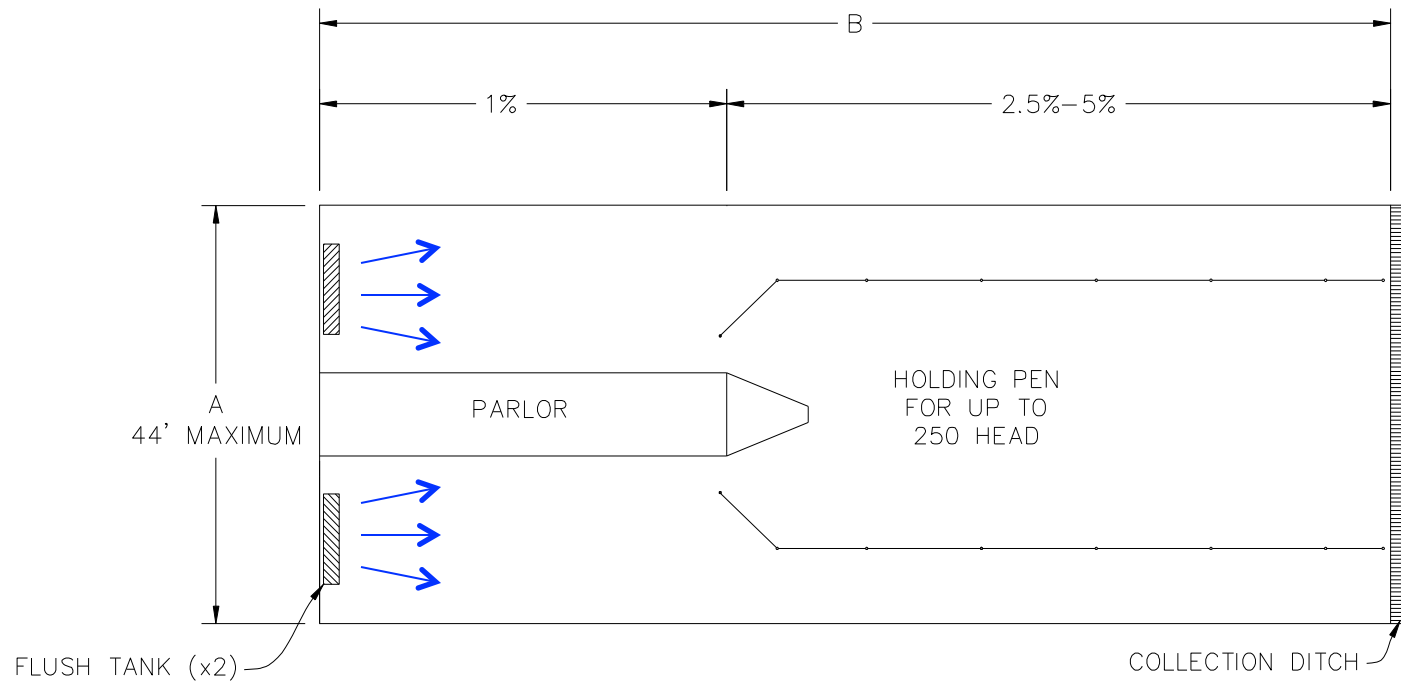

- Flush Tanks
- ✓ Complete Self Contained Units

- 2m³ to 5m³ capacity
- 150Lps

- Flush Tanks – Typical System Layout

- Flush Tanks

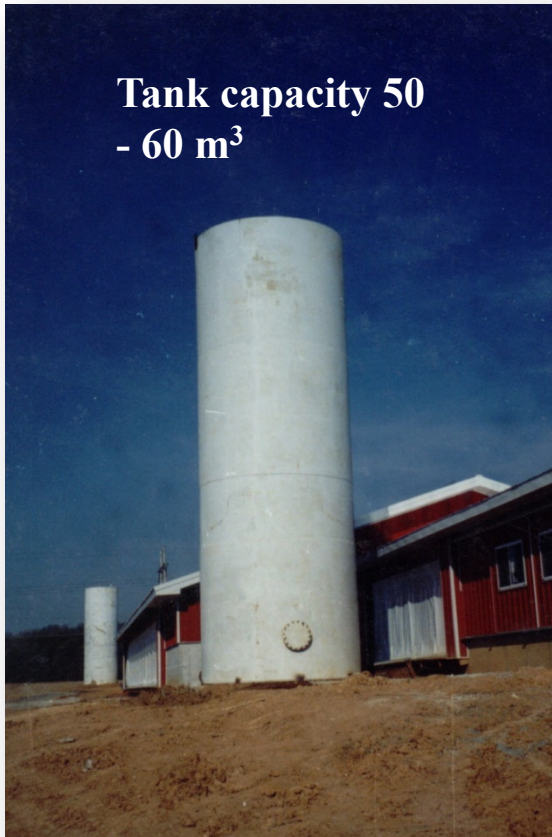

- Additional applications of Flush Tanks
 - ✓ Applicable to many places, especially where only one or two lanes required
 - ✓ Ideal for fresh water flush
 - ✓ Great for small remote areas

- Flush Valves and Reservoir

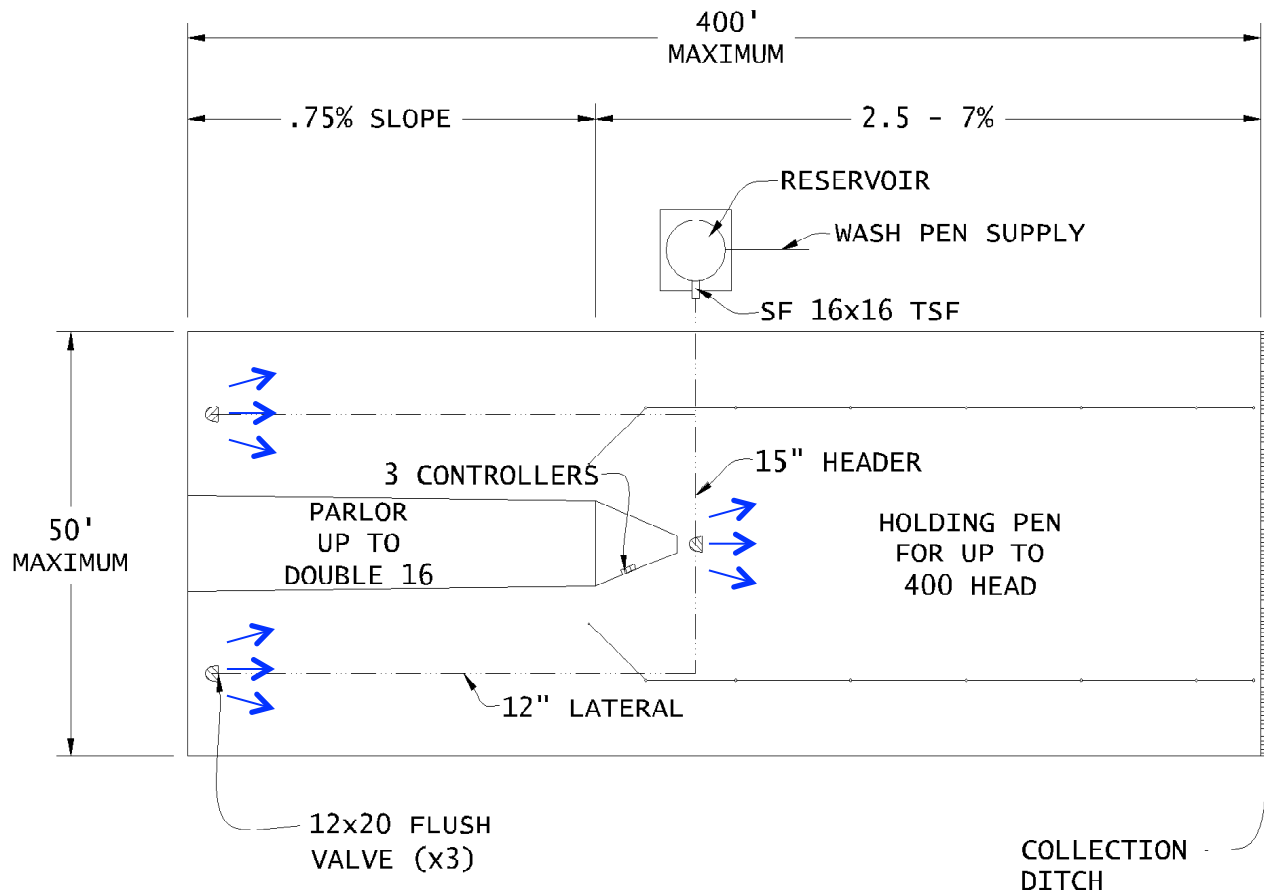

220 Lps

315mm diameter pipe

■ Flush Valves & Reservoir – Typical System Layout

- Valve Flushing

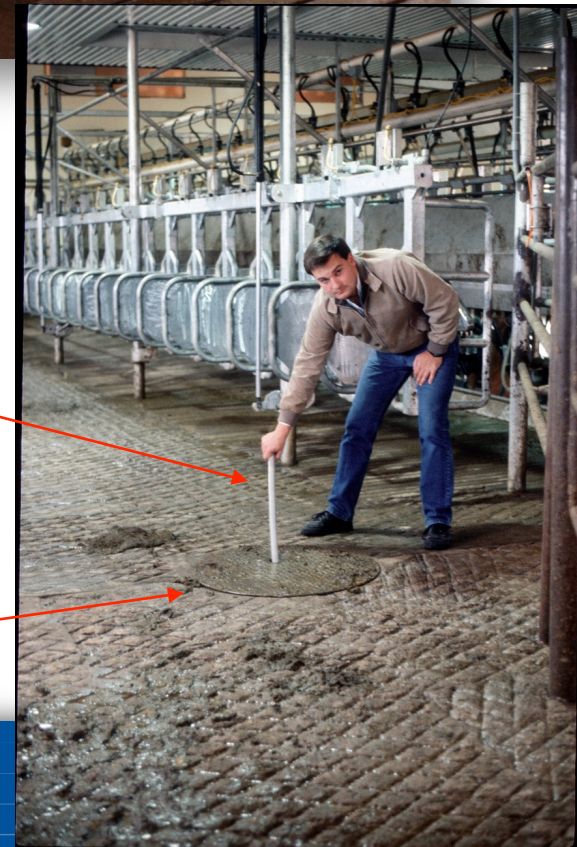

- Double Slope Parlors

**Two
Valves
Back to Back**

Removable Handle

Rotatable Valve

■ Advantages of High Flow Rates

- ✓ The quicker we get the required volume on the floor the smaller the volume
- ✓ The turbulent wave action breaks-up manure and aides rapid removal
- ✓ Steeper slopes help the efficiency

- Deck Wash Systems

Nozzle at Every Other Stall

Wash Head

Minimal misting

Note complete wash coverage, no dead area

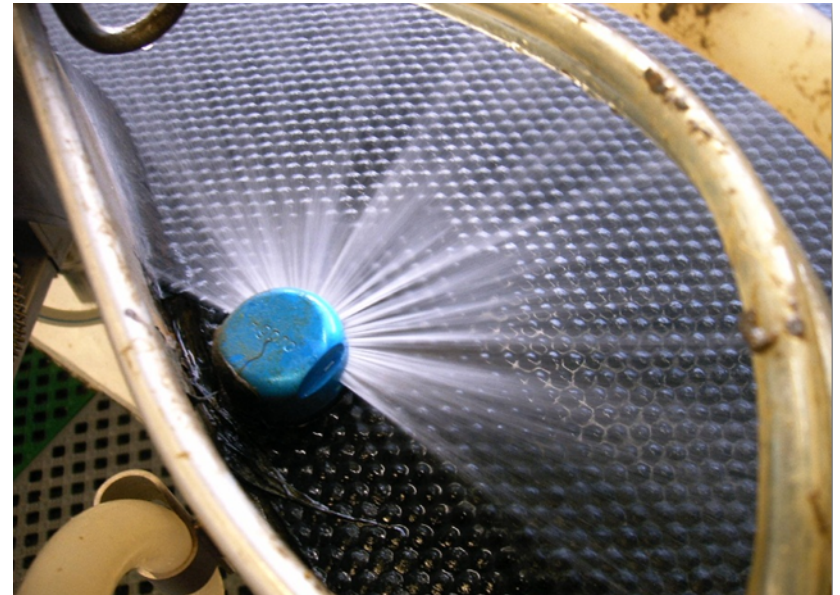

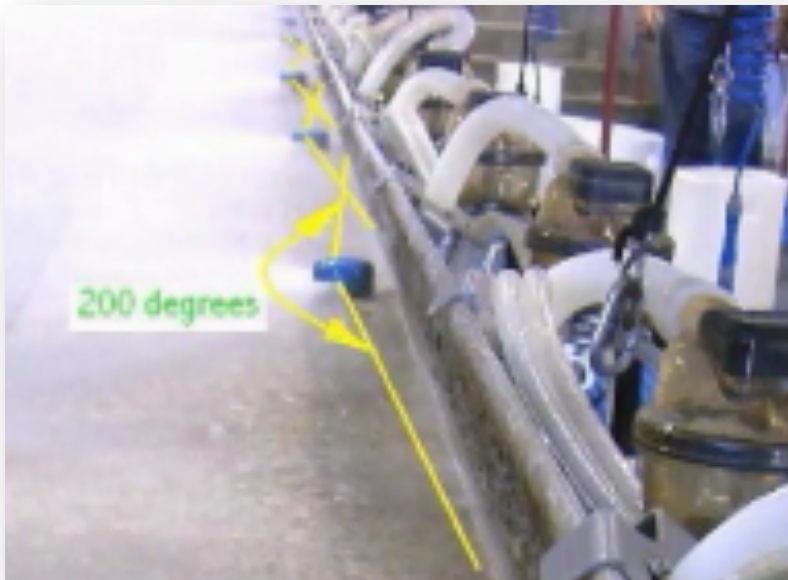

✓ Deck Jet Parlor Wash

✓ Deck Jet Parlor Wash

Review :

- Parlor/Holding Pen hose down alternative
- Capable of cleaning only at the end of each milking
- Labor intensive
- Increased total water usage
- Doesn't get done

✓ Parlor Flush Results

✓ ***YOU SHOULD REALLY FLUSH
YOUR PARLOR !***

- ✓ Labor efficient. Complete cleanup in seconds
- ✓ Same or less amount of water required if managed properly
- ✓ Ability to cleanup at any time, even when cows are present
